Hello. I am a junior web developer with a background in music, excited about creating amazing user experiences and bringing ideas to life. I take a creative approach to writing code, and my passion for learning keeps me constantly looking for ways to improve my skills. Recently having graduated from Lighthouse Labs, I look forward to joining a team of like minded people where I can continue to grow as a developer.

EXPERIENCE

☐ Lighthouse Labs - Built several full stack software projects both on my own and as part of a team. Please visit my portfolio for examples.

☐ Musician - 10+ years playing in bands, having toured through North America and Europe and released multiple records. Experience in tour booking, managing group finances, and pursuing unique opportunities.

INTERESTS

Punk, Music,
Travel,
Entrepreneurship,
Computer
Programming, The
Past, The Future

☐ Courier - Purolator/FedEx/Canada Post
From 2007 - 2018 I worked as a courier at large corporations where I helped accomplish daily business goals. From training new employees to planning routes, I gained unique leadership skills and became an easily adaptable self starter.
